# Daffodils—Narcissus

The dancing Daffodils are a marvel of beauty in earliest spring. Their varying tones of yellow, from softest cream to boldest gold, seem especially appropriate to the new season. Daffodils and Narcissus do well in almost all soils and locations and are a permanent addition to the garden. Plant them where they can be left alone to increase from year to year.

## GIANT TRUMPET DAFFODILS

They are among the most cheering and lusty of all spring flowers. Hardy and dependable, they lead the parade of Narcissus, making a superb picture by themselves or combined with other early-flowering bulbs.

### THE PINK DAFFODIL

This Daffodil, Mrs. R. O. Backhouse, has held its position as "the" pink Daffodil even though there are now others in this class. The flowers are particularly dainty in effect but are nevertheless long lasting and of exceptional substance.

3 for 75c    **12 for \$2.50**    100 for \$19.00

### DEANNA DURBIN

A group planting of this beautiful new variety on the bank of a stream, or tucked between shrubs and evergreens, makes one of the loveliest of spring pictures.

DARWIN TULIPS

Rainbow Mixture

For flower lovers who prefer various colors mixed together instead of one-colored groups, here is an inexpensive rainbow mixture of the five main colors with their many different variations. This bright and striking mixture is well proportioned for color harmony. Besides the beautiful effect it creates in the garden, it gives a wealth of flowers for cutting.

Ten Blue Ribbon Darwin Varieties

Darwins are usually the mainstay of a Tulip planting. They are large and cupped, with very long stems that make them perfect for cutting also. Against a dark hedge Darwins make an unforgettable picture; use them, too, in clumps in the perennial or shrub border and in beds by themselves. Borders of pansies and forget-me-nots set them off to perfection.
